# PLAGIARISM AND ACADEMIC ETHICS

By Andrii HUBAI andrii.hubai@uni.lu

## **DEFINTION OF PLAGIARISM?**

[1] Unauthorised use of thoughts, written texts, ideas, inventions, songs, pictures with [2] representing them as yours (either intentionally or unintentionally).

## Why plagiarism is BAD?

- Plagiarism always be avoided in legal research.
- Why? If legal research is something not new but stolen from someone else's research, we lose the purpose of legal research on its whole.
- Developing Law School and legal research means creating new material, new doctrine in order to update the existing one conformingly to the new developments of the legal reality.
- Violation of intellectual property regime.

Ask the question to yourself: would I want someone to steal my ideas/hard work/inventions?

### WHAT IS NOT PLAGIARISM?

#### There is no plagiarism in:

- Paraphrasing + providing the source
- Citing/Quoting/Referencing
- Citing your own material

## Consequences

- Plagiarism is not a legal but an ethical offense.
- Plagiarism violates the ethical norm, but it does not in itself constitute unlawful conduct. Unless specified by the pertinent law, i.e. intellectual property rights.
- The act of plagiarism is seen as dishonor. It is a damage to his/her reputation and academic integrity.

## Types of plagiarism

Two common forms: Direct and Mosaic

Author:

Alan Fosk, "On Investment Arbitration", 2019 Poxford University Press.

"Having analysed more than 2500 Bilateral Investment Treaties (BITs) under the new method of quantitave restructuring, we have arrived to several conclusions. First, the field of investment arbitration will grow by two times by the end of 2025. Second, majority of the claims (90%) will concern the right for damages."

First, the field of investment arbitration will grow by two times by the end of 2025. Second, majority of the claims (90%) will concern the right for damages."

Current article had reviewed the aspects of the upcoming trend in investment arbitration. In particular, it is now clear that investment arbitration will evolve and expand with a minimum of fifty percent. In addition, one could witness the uprise of damages claims. To conclude, the world of investment arbitration would continue to grow and evolve.

"Having analysed more than 2500 Bilateral Investment Treaties (BITs) under the new method of quantitave restructuring, we have arrived to several conclusions. First, the field of investment arbitration will grow by two times by the end of 2025. Second, majority of the claims (90%) will concern the right for damages."

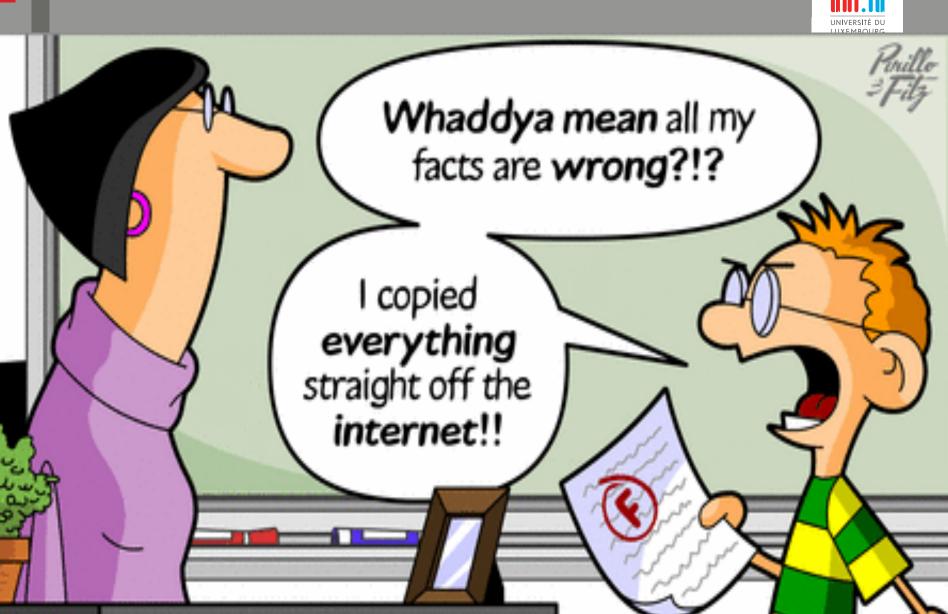

Current article had reviewed the aspects of the upcoming trend in investment arbitration. In particular, it is now clear that investment arbitration will experience the rise of at least 50%. This conclusion is reached via utilising the quantitative restructuring method. Besides, there is a certain prevision of having the prevailing majority of claims to relate to the matter of damages by the middle of the current decade. To conclude, the world of investment arbitration would continue to grow and evolve.

"Having analysed more than 2500 Bilateral Investment Treaties (BITs) under the new method of quantitave restructuring, we have arrived to several conclusions. First, the field of investment arbitration will grow by two times by the end of 2025. Second, majority of the claims (90%) will concern the right for damages."

Current article had reviewed the aspects of the upcoming trend in investment arbitration. For instance, we have used the novelty method of gathering the regrouped information under the principle of numbering. Upon this, we can now suggest that the alternative dispute resolution field will double in the upcoming years. Besides, we witness a steady trend of the growing number of disputes dealing with the harm recovery. To conclude, the world of investment arbitration would continue to grow and evolve.

#### Benefits of avoiding plagiarism

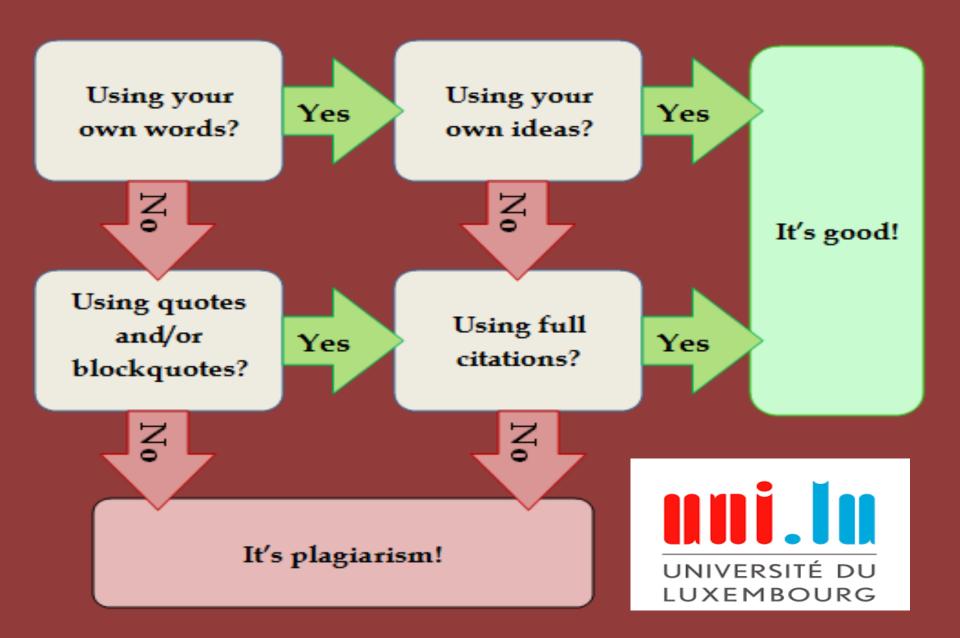

When you cite particular source that is well-respected. Your words gain extra weight.

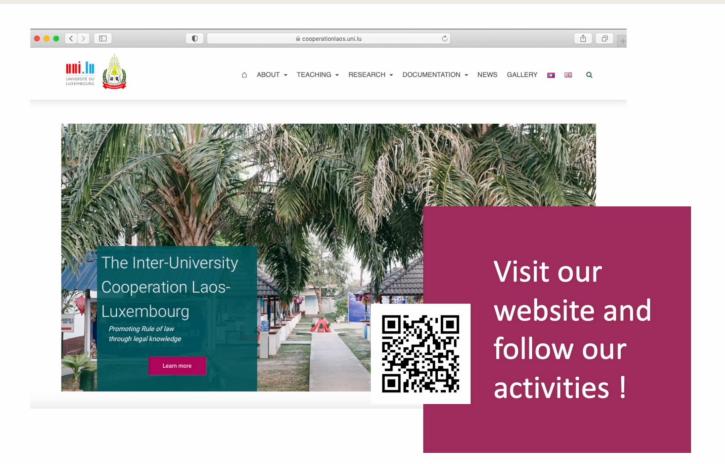

# They will catch you...no doubt

All respected Universities use the computer software detecting plagiarism.
